

SHENANDOAH VALLEY SIMMENTALS

Shenandoah's Shining Stars

THE SPRING SALE

SATURDAY, **May 11, 2019** | 1:00 PM at the Farm | Quicksburg, VA

Hello Everyone,

It's sale time again and we're SUPER excited about this offering. It's the best yet, top to bottom. Please join us Saturday, May 11th at 1:00 pm for our 13th production sale.

Spring in the Shenandoah Valley is spectacular. The Valley is teeming with new life...green leaves, magnificent flowers, and newborn critters! It's a fresh start after a brutal winter, the worst in memory.

We've been breeding Simmentals for over 43 years in the mountains of rural Virginia. This herd is our pride and joy. I interact with the cattle daily and know them inside and out.

They're treated with respect, well-cared for, and always eat before we do. Our motto is "Home of the Keepin' Kind" and the cattle in this offering are definitely keepers! As always, we're committed to sharing our top genetics and you can buy with confidence. We're here for the long haul and to help you in your journey. Many fads have come and gone in this industry, but we've continued to breed proven, practical, predictable cattle that thrive in many environments. We use dynamite new sires as well as mainstay sires who've stood the test of time. You'll see many generations of superior old cow families in the pedigrees. Genetics and EPDs change quickly, but one thing is certain, regardless of the numbers on paper, these cattle are outstanding in the pasture. Cattle pay our bills and these cattle flat out perform...and as an added bonus, they're pleasing to the eye! We appreciate our customers who believe not just in our cattle, but the program behind them.

These beauty-gorgeous Ladies of the Valley are high maternal, performance females from rock-solid cow families. They're "pasture pretty" and should excel as unique donors and highly productive brood cows. If you want through the roof numbers, breed them to hot new sires and watch their genetic potential explode. Having spring and fall calving herds gives us flexibility to keep our calving season tight. If a heifer needs a little more grow time before breeding, we hold her over to breed early the next season. This little extra time develops her into a much nicer cow.

We're also offering a select set of open purebred heifers that stem from our genetics. These females should perform well for any serious cattleman.

The bulls are athletes, developed in Virginia range conditions, not in a dry lot. They're designed to efficiently convert grass to meat, thrive on fescue, travel rough country, and withstand the wide weather extremes experienced in these mountains.

They're designed for different purposes. Some are scale pounders bred for cattlemen who sell calves at weaning. Some are high maternal bulls bred to sire fantastic replacement females. Some should sire calves who bring home blue ribbons. The multi-purpose bulls should do it all. These bulls are extremely consistent, almost like peas in a pod.

We also have unique embryos from powerful donors and semen from outstanding sires available private treaty. These are one-of-a-kind genetics you won't find anywhere else.

Cattle folks, near and far, are the same breed of people. We all endure similar trials and tribulations, witness the most amazing miracles, have a deep-seated love of the land, and know the true meaning of friendship. A sincere thanks to those good-hearted, dedicated friends who help make this sale possible, with special thanks to Barry Armstrong for his help year-round.

Please visit our website for the on-line catalog and videos and contact me with any questions. Our video auction is held in a 1860s barn on our historic Century Farm settled in 1735. Sale time is an extended family reunion where friends gather to talk cow and enjoy southern hospitality. It continually amazes us how many long-term friendships develop from the simple purchase of a cow. If you can't join us in person please tune in to LIVEAUCTIONS.TV or give us a call.

Stay safe, healthy and happy my friends. Hope to see you sale day!

Lisa Zirkle

HERD HEALTH

All females will sell with proper health certificates for immediate interstate-shipment. The bred females have been pregnancy examined and are confirmed safe, unless otherwise posted or announced. For cattle leaving Virginia, a Certificate of Veterinary Inspection will be available for immediate shipment. Cattle requiring additional health measures for entry into their state of destination will have tests performed within one week of the sale at the seller's expense. Each animal will be at the purchaser's risk immediately after it is sold. A detailed update sheet and sale order will be available sale day.

EPDs

The EPDs listed are the April 2019 numbers. Please note the EPDs may change from the time the sale catalog is printed until the registration papers are transferred.

SALE TERMS AND CONDITIONS

All animals sold will be sold in ordinance with the suggested guidelines of the American Simmental Association. For updated EPD's, genetic status, plus the current ASA guidelines and conditions go to www.simmental.org. Announcements made sale day and from the auction block during the sale take precedence over printed material associated with this sale. Anyone attending the sale attends at his or her own risk, Shenandoah Valley Simmentals will not be responsible for any personal injury while attending this sale.

SEMEN INTEREST

Shenandoah Valley Simmentals will be selling full possession and 70% semen interest of all bulls, and retaining 30% semen interest. The buyer has full control, full possession, 100% of the salvage value and 70% semen interest. Any bulls that Shenandoah Valley Simmentals wishes to collect for in herd use semen will be done at the buyers convenience and Shenandoah Valley Simmentals expense. This will affect very few bulls.

ANNOUNCEMENTS

Announcements at the sale by the owner, auctioneer, or sale management will take precedence over statements made in the sale catalog. We reserve the right to withdraw any sale lot not meeting our specifications prior to the sale.

BULL GUARANTEE

All bulls have passed a complete breeding soundness examination performed by a veterinarian. All bulls are guaranteed for breeding soundness and injury for the first breeding season, defined as 90 days from first turnout, barring abuse, neglect and poor management practices. If the bull needs to be replaced a replacement bull of equal value will be provided. If a bull of equal value is not available, a credit less the salvage value of the bull will be applied to the next SVS sale. Salvage values must be documented and provided to SVS. Please notify SVS promptly if injury occurs. All cattle sell under the standard terms and conditions of the American Simmental Association guidelines.

SALE REGISTRATION AND PAYMENT

All buyer numbers will be issued with a valid ID, and payment is due the day of the sale, unless prior arrangements have been made. SVS would appreciate timely settlement of all receivables within 15 days of the sale date. Cattle will NOT be transferred until paid for in full.

REGISTRATION CERTIFICATES

Cattle will be transferred to the buyer at the seller's expense. Buyers must provide the sale clerk with complete information for transferring registration certificates.

A Farm Rich In Shenandoah Valley History

Shenandoah Valley Simmentals

My Dad

This farm has withstood the test of time. It's rich in Indian artifacts and early American culture. It survived the Civil War and Great Depression, and with the efforts of Blair, Maxine and Lisa Zirkle, the tradition of farming continues. It has evolved from a self-sufficient early Appalachian family farm, to an apple/peach orchard, to range turkeys, a chicken grow-out, a dairy, a commercial cattle operation, and now to a nationally-known Simmental seedstock operation. Blair and Billy Zirkle, brothers, brought the first purebred Simmental bull into the Shenandoah Valley in the mid 1970s. Caesar, from the King Ranch in Texas, was bred to commercial cows to develop a purebred herd. In 1976, I began raising Simmentals.

Many folks struggle to decide what they want to do with their lives. I never had to. I always wanted to farm. I remember so well the day I got my first heifer...a Simmental! My father gave me an orphan and I couldn't have been happier because Daisy was the start of my herd! Forty years later, we're still raising these amazing cattle.

Through the years, there have been many fads and changes in the breed, but through it all, we've remained focused on breeding practical, predictable and profitable cattle. Our cattle have received many awards from the American Simmental Association, exhibitions and bull test stations, but the biggest award is our many repeat customers.

Peter Gartner/Cortner/Gortner House - The Settlers

This log house, located 100 feet northeast of the Samuel Myers house, is one of the oldest known dwellings along Holman's Creek. Peter Gartner from Germany was living there by 1735 and was the first person granted legal possession of the farm in 1750. He died in 1758, and it eventually became the property of Samuel Myers.

It is said that in 1746, Thomas Lewis and Peter Jefferson, (Thomas Jefferson's father), camped here while surveying the Fairfax Line. The Fairfax line runs between the headwaters of the Potomac and Rappahannock rivers and forms the western boundary of the 1649 land grant from King Charles II of England to some loyal friends in Virginia.

Gartner/Cortner Cabin Chimney

This one-room log house with a dirt floor and loft was built on rocks to guard against rising water and was near a spring to minimize the threat of Indian raids while carrying water. At night, livestock, which played an extremely important role in the family's survival, was brought into the cabin for protection from predators and Indians, while the family slept in the loft. The chimney and foundation remain.

Beauty-gorgeous says it all! Rose Garden is a showstopper! This solid red, star-faced darling leaves nothing to be desired. She's feminine with loads of volume, is zippy-fronted and has a picture-perfect udder. This female is super well made from nose to tail. She is great at the ground, has all the eye-appeal one can put in a heifer and yet has plenty of base width. Her EPDs are impressive. Balance from a numeric and phenotypic standpoint is written all over her. Rose Garden will be a donor, no doubt! The Kelby family has hit it out of the park again!

The bosses!!! My mom, Maxine, (left), and aunt, Madeline, (right), at our fall sale.

This choice of first calf heifer pairs is one of the greatest buying opportunities we've presented in years. More than 40 years of breeding sound, performance-oriented, good-looking cattle are bred into these lovely ladies. These females are the top cut of our spring 2017 heifer crop and look how they've matured! We believe in heritage and cow family strength and these young diamonds are examples of what these families produce time and time again. If your goal is to produce cattle with growth, looks, and sound fundamentals that are genetically backed by cows that do an awesome job, then study this offering carefully. These front pasture females are balanced, feminine, have donor potential, and have many generations of performance engineered into their pedigrees. They're both definitely the "keepin' kind".

This female is all about performance and we're crazy for selling her! She's an excellent milker, has a quiet demeanor and is always in your back pocket looking for a treat! Our program is based around consistent producers just like Crazy Girl. Her daughter, Witchy Lady, who also sells, and her stout heifer calf at side, sired by SVS Patriot, show what she can do. The proof is in the pudding!

Shade Tree is the only half-blood SimAngus female being offered. This homozygous black beauty has an elegant, feminine look with a gorgeous head and neck, while maintaining tons of rib shape and capacity. This sharp female is a heavy milker with a nice udder. She has it all...on paper and in the front pasture! Take advantage of this opportunity to own this young female with proven genetics and a super nice 3/4 Simmental x 1/4 Angus bull baby at side. He could certainly be your next herdsire!

We're very pleased with the performance of our SVS Reville daughters like Oriole. She's a calving-ease female with high maternal ability, balanced figures, and outstanding stayability in the top 3% of the breed. It doesn't get much better than that. She's the kind that should produce low input offspring and you can count on her to pay her way for many years to come. She's doing a super job first time out of the gate!

Owned by Lawrence Cattle Company. Stormie came along and surely took us by storm. This heifer quickly stole our hearts, not only from her jet-black, flashy look, but also because she was sired by one of the first bulls we bought from Lisa at Shenandoah Valley Simmentals. Being packed with a great amount of rib and thickness paired with her Stayability EPD in the top 20% of the breed, Stormie is set to produce quality calves with her great genetic background for a long time coming.

Prudence puts it all together. This homozygous black female excels in maternal ability and longevity, and should calve by sale date. She should have been named Fancy! She's sharp, ultra-feminine, and is "pasture pretty". Her sire, SVS Shenandoah, made her that way! Unfortunately, we lost "Shenny" last summer to a wild cherry, so not many more of his progeny will be available. Get 'em while you can!

Those of you who've followed our program throughout the years, know the spectacularly feminine, highly productive daughters that SVS Keep Dreamin' sires. Gretchen is no exception. She's as pretty as they come, deep and wide, has a quiet disposition and balanced EPDs. Who wouldn't love to have a whole herd like her? Her maternal granddam, Red Silk, kept producing until age 19! These are the kind of females, like Gretchen and her daughter, to build a herd around.

Owned by Lawrence Cattle Company. What is there to say about this heifer? First, Ruby is the hardest female to part with. This solid red heifer is the kind that makes a great brood cow. Her momma is one of a kind and she has followed closely in her footsteps. Putting a package together of great feet and legs, broodiness and thickness, along with the right amount of femininity this girl is bound to do what needs to be done. Then, finally add the flashy style of her sire, Steel Shot, and she is hands down capable of winning in the show ring.

Owned by Lawrence Cattle Company. This girl is what we were after all breeding season. Ellie Mae hit the ground with that solid black body and a splash of white on her face, paired with a pink nose that we love adding to our cattle. Out of one of our go-to, performance cows crossed with Shell Shocked, this girl is set to add calving ease to someone looking in that direction. Her depth and broodiness paired with her CE, BW, and MCE all in the top 20% of the breed, should make her a female anyone would want to take home.

Shiny Bubbles is super sharp. She is the natural daughter of our SVS Snap Dragon donor. This heifer gets her powerful performance from her dam and the beautiful femininity from her sire, SVS Shenandoah. Expect her to be productive in the herd a long time and to be an asset to anyone's program! These are out-cross genetics at their finest.

Pasture Exposed to SVS Stockade DZ59, 6-13-18 to 10-10-18, EPDs Projected.

- A Small Piece of SVS History -

A brick foundation with a mortared floor was discovered several feet underground when installing a water line. The James Madison Archaeology team conducted a dig to determine its use. While the area was rich with artifacts, the type of structure remains unclear. What a fun day that was!

Artifacts found near the underground foundation. According to archaeologists the items date from 1820 to 1870.

A 100+ year old orchard on the farm was nearing extinction. To preserve the old apple varieties, scion wood was collected from 55 original trees and reset in a new orchard. This year we may get to sample the old varieties for the first time in many years!

If only this field oak could talk!

Seldom do we part with our herdsires, especially a SVS Humdinger grandson, but we've decided to share our best genetics. Not only is SVS Maverick uniquely marked with a star on his face just like our sale's namesake, Shenandoah's Shining Stars, but he's also a maternal sib to SVS Rawhide who was purchased by Hilltop Simmentals of South Dakota and leased to Accelerated Genetics. Maverick's sire, SVS Bell Ringer is quite an impressive performance sire too! Maverick is a homozygous black, homozygous polled power sire for use on mature cows. With an adjusted weaning weight of 831 pounds he puts it all together as shown by his genetically enhanced EPDs and his impeccable phenotype. He's thick, deep, loose-made and travels freely. He's a maternal sire also excelling in growth and carcass traits. He's the real deal and is as easy on the eyes as he is to handle. Maverick is definitely a Shining Star!

Powerful, performance genetics at their finest! SVS Fast Draw is the product of time-tested genetics. That's the beauty of proven, practical, profitable genetics created over many, many years. With an adjusted birth weight of only 77 pounds and an adjusted weaning weight of 784 pounds that's not too shabby for his 14 year-old dam and our tremendous donor, SVS Pansy! This versatile, soft, free-moving herd sire with outstanding EPDs, should excel in both growth and maternal ability and has a BW ratio of 105, WW ratio of 104 and YW ratio of 107. As you view the entire offering you'll note a common thread...SVS Badlands. Fast Draw's sire, SVS Badlands, simply put, sires amazing cattle...males and females. They're smooth, they're high performance, and they're super stylish! We almost kept Fast Draw for our own use, but since we're committed to offering our best....here he is!!!

Polled/scurred. This homozygous black bull is designed to sire calves that pack the punch on sale day and to sire females with staying ability. I can't say enough good things about the cow power on the maternal side of his pedigree. They never disappoint! SVS Standin' Tall is as long as a freight train, smooth-patterned with a real neat shoulder, is powerful and free-moving with a touch of frame. Use him on Angus or commercial females then sit back, watch his calves grow like weeds, and smile all the way to the bank!

Polled/scurred. SVS Flash Back is homozygous black, long, extremely correct and masculine. Occasionally we dip into the archives and bring back some old genetics. Why? Because they work and they're what got us where we are today. A long-time favorite is SVS Flash Back's sire, BF K065 Talladega. Oh, what a female producer he is! These old school genetics can't be found anywhere else. They worked then, and they work now (adjusted BW 78 and WW 767, BW ratio 104, WW ratio 112, and YW ratio 106). Genetic performance like this is still relevant today. Don't miss this rare opportunity to put Talladega genetics into your herd!

Flashy, flashy, flashy red fire ball! Here's the only red bull in the offering, and folks, he's a good one! Here's a calving ease bull that has it all...performance and looks. SVS Fire Ball is a natural calf of one of our most impressive donors, SVS Right as Rain. Combining this maternal lineage with SVS Sundance produced this exciting package. Although he's one of the youngest bulls being offered, this black-nosed sire is very complete in his make-up and data. He's as thick as they come, deep, extremely correct on his feet and legs, and is just plain fancy. This versatile bull should produce calves that excel in growth and daughters that are drop dead gorgeous. Here's a special chance to tie into a red bull who should do you all kinds of good!

Look at this powerfully impressive SVS Patriot son. Patriot sure put his mark on SVS Triple Threat! This bull is built to travel pastures with ease, possesses length, depth and volume in a smooth-made, muscular package. With 10 EPDS in the top 25% of the breed, here's a bull that means business. If you're looking for growth, maternal or carcass traits, Triple Threat has you covered. Bulls with his genetic merit are few and far between. Here's a real opportunity!

He's the whole shebang! He's got the pedigree, he's got the EPDs, he's got the performance, and he's got the looks. This homozygous black, calving-ease sire comes from a long-line of fancy females including his dam, SVS Calico, who is a gorgeous SVS Keep Dreamin' daughter. SVS Grand Slam is flashy, deep-ribbed, correct and stout from nose to tail. His pedigree is intriguing and his looks make you drool.

Here's a homozygous black, blaze-faced son of CLRS After Shock, who's consistently sired very functional, stylish cattle for us. SVS Full Moon Rising is no exception. This calving ease bull with balance EPDs could be used on heifers or cows. He's soft, deep, has a wide-hip and is extremely thick, in a moderate, beautiful-profiling frame. Just like his mama, he's got "the look". Think how feminine his daughters should be!

This bull is the result of combining modern genetics from his sire and maternal grandsire with those of one of our original donors SVS Bettina, who was an F model from 1996. Many of our cow families originated decades ago and are still going strong today. SVS Mud Boggin' is a calving ease sire with growth and maternal ability. He's eye-appealing, moderate in structure, deep-bellied and thick-quartered. If you need a performance, easy-fleshing sire to add good looks, he's the one.

Polled/scurred. We've always wanted to name a bull T-Bone, so we did! Here's a versatile SVS Shenandoah son with solid EPDs. On the dam's side, SVS Leaders Red Rose was a 1994 model and this old cow family has produced many generations of nothing but good. T-Bone is no exception, being long-patterned with smooth muscle design and a hint of frame. Use him on commercial cows to create calves that excel in the marketplace and replacement females you'll be proud to own.

SVS Drifter is a calving ease specialist with sound EPDs across the board. He's homozygous black, has excellent feet and legs, ample length and a touch of frame. His pedigree is a little different too. His sire, ASR Augustus, from Willie Altenburg's herd in Colorado, has sired some exceptional cattle for us. If you want to raise good looking cattle with stretch and growth, (adjusted WW 776 and YW 1205), look no further!

SVS Eight Ball is gonna attract attention wherever he goes. This blaze-faced SVS Sniper son is ultra-fancy. His volume and mass come from his maternal pedigree, SVS Milestone and SVS Humdinger. His smooth lines come from SVS Sniper. Add it all up and the sum is Eight Ball! Use him on mature cows to add growth, carcass merit, longevity and style. He's from the same maternal lineage as our high performance donor, SVS Snap Dragon. Great genetics just keep on ticking, generation after generation. Take note here!

Loaded with eye-appeal, SVS Domino is bound to turn heads. This blaze-faced SVS Shenandoah son is clean in his lines, sharp-fronted and deep. One of the youngest bulls to be offered, he's shaping up to be front and center in the pasture. Rather you use him on purebred or commercial females, his calves won't be lost in a sea of black at the sale barn. With a beautiful dam, and his maternal granddam who was in the donor pen at Circle H Simmentals in South Dakota, think how pretty a field full of his blaze-faced daughters would be!

Shenandoah Valley Simmentals Buyers Incentives

HOUSING YOUR PURCHASE

Bulls and females will be fed and cared for free of charge for one week following the sale and will be housed at a rate of \$3.00 per day thereafter until you are ready to pick up your purchase. All animals must be picked up by June 15, 2019 to allow SVS for developing more animals.

BULL GUARANTEE

All bulls have passed a complete breeding soundness examination performed by a veterinarian. All bulls are guaranteed for breeding soundness and injury for the first breeding season, defined as 90 days from first turnout, barring abuse, neglect and poor management practices. If the bull needs to be replaced a replacement bull of equal value will be provided. If a bull of equal value is not available, a credit less the salvage value of the bull will be applied to the next SVS sale. Salvage values must be documented and provided to SVS. Please notify SVS promptly if injury occurs. All cattle sell under the standard terms and conditions of the American Simmental Association guidelines.
