WELCOME FELLOW CATTLEMEN AND CATTLEWOMEN!

It's sale time and we're SUPER excited about this offering. It's the best yet! Please join us Saturday, April 27, 2024 at 1:00 pm in Virginia's beautiful Shenandoah Valley.

2023 was a very difficult year due to the worst drought in memory, but it's a new year with new babies, green grass and a fresh start!

Only bulls were to be offered this spring, but the hard decision was made to down-size the spring-calving herd. This is a very sad decision for me, but a tremendous opportunity for potential buyers.

I've been breeding Simmentals for 48 years in the mountains of rural Virginia and my family even longer.

This herd was one of the first in Virginia, with American Simmental Association member number 3645, Holman's Creek Farm. My family started grading up to purebreds in the early 1970's. In 1976 Dad gave me an orphan heifer calf and I was in high cotton! The first four years she had bull calves, so my herd progressed slowly. Then I got the opportunity to purchase heifers from those bound for market. From there, with perseverance, hard work and faith, my herd developed. By the early 1980's Holman's Creek Farm no longer registered cattle, but Shenandoah Valley Simmentals did. I had discovered my passion in life.

This long story is shared to say that this herd, and especially the

ladies, have been bred for many, many years to be high maternal, performance females. These are homegrown genetics at their finest...bred with purpose...bred with a vision. They're the most correct, easy-keeping, good-natured, functional, trouble-free mamas with style that I know how to breed. Don't be afraid of these power females. They are bred for real cattlemen and cattlewomen...and they flat out get the job done!

And remember, great females make great bulls! These bulls are athletes developed in Virginia range conditions

Lisa Zirkle, Owner

and all have passed a complete breeding soundness examination. They're designed to efficiently convert grass to meat, thrive on fescue, travel rough country, and withstand the wide weather extremes of these mountains.

Many fads have come and gone, but we've continued to breed proven, practical, predictable cattle that thrive in many environments. We focus on maintaining original cow family genetics that got us where we are today. We don't just focus on numbers. Oldies are still goodies!!! Cattle pay our bills and these cattle flat out perform. These are one-of-a-kind, outcross genetics you won't find anywhere else. Our motto is "Home of the Keepin' Kind" and the cattle in this offering are definitely keepers! We're committed to sharing our top genetics and you can buy with confidence.

Please visit our website for the on-line catalog and videos and contact me with any questions. Sale time is an extended family reunion where friends gather to talk cow. It continually amazes us how many long-term friendships develop from the purchase of a cow. We appreciate our customers who believe not just in our cattle, but the program behind them.

A sincere thanks to those good-hearted, dedicated friends who help make this sale possible, with special thanks to Barry Armstrong for his help year-round.

Cattle will be available for viewing after 2 pm Friday, April 26th.

Stay safe and healthy my friends!

Hope to see you soon! - Lisa Zirkle

Lisa Zirkle, Owner | 540-335-1885 (cell) 3691 S Middle Road Quicksburg, VA 22847 Email: lisaz1@shentel.net Barry Armstrong, 540-975-1474 Shenandoah Valley Simmentals, Boers, and Tunis www.shenandoahvalleysimmentals.com

WelcomF

On behalf of Ruble Cattle Services and Shenandoah Valley Simmentals, we would like to welcome you to this year's spring sale. We have the great pleasure of once again working with Miss Lisa Zirkle as a sales management team. It is truly remarkable to work with such a storied program who has been breeding Simmental cattle in the mountains of rural Virginia since 1976. Their motto "Home of the Keepin' Kind" could not be more accurate. The bulls are perfectly developed out in the open range and because of this they are athletic and ready to breed cows as soon as you take them home. Both the bulls and females are from top-of-the-line cow families proven to work on fescue and in range conditions. The entire offering is a great blend of maternal and performance with forage converting efficiency bred into them. When you purchase cattle from Shenandoah Valley Simmentals you are making an investment in a program that has been here in the past and will be here long into the future. This sale offering will be one of the best in the country for rugged bulls and top end females in all stages of production. Miss Lisa has used the top genetics from River Creek Farms, Triangle J Ranch, Keller Broken Heart Ranch, Gibbs Farms and others to blend with her outstanding cow families. With this past year's up and down weather and drought in much of Virginia the time-tested genetics from SVS have once again proven their work. It is hard to find this many front-end females and bulls especially in a purebred package anywhere in the country. Miss Lisa has done a masterful job of breeding and developing the lots in this year's productions sale. A month ago I visited all the pastures and development areas with Miss Lisa. I came away from my trip in awe of the set of cattle working on fescue and mountain pastures. I was also able to make herd visits as far away as AL and WY to see her genetics thriving in other environments. Her cattle perform in any location in the US. Miss Lisa's cattle work for her so she doesn't have to work for them. I promise they will go home and work for you! Many of the females selling this year would not be for sale normally but with the drought and losing leases, some of the really good females will be offered for

your appraisal. Barry and I have to twist Miss Lisa's arm to sell some good females to make room for the next calf crop. I will be out the week ahead of the sale diligently taking notes on the entire offering.

Please feel free to contact any of our sale management team with regards to any questions you may have. We are here to serve you in any capacity.

TERMS AND CONDITIONS

All Animals will be sold in accordance with suggested guidelines of the American Simmental Association.

ANNOUNCEMENTS

Announcements made sale day take precedence over printed material in the catalog or other printed material associated with the sale.

SALE REGISTRATION AND PAYMENT

Buyer numbers will be issued with a valid ID, and payment is due the day of the sale, unless prior arrangements have been made. Timely payment of purchases is much appreciated.

HOUSING YOUR PURCHASE

Bulls and females will be fed and cared for free of charge for one week following the sale and will be housed at a rate of \$5.00 per day thereafter until you pick up your purchase. All animals must be picked up by May 15, 2024 to allow SVS space to develop new cattle.

INSURANCE

Insurance will be available sale day or by asking any of the team members. We strongly recommend Jame Kreiger 812-208-0956

We are proud of our heritage and our farm's history. We strive to preserve the past to honor those before us.

LIABILITY

All persons attending the sale do so at their own risk. Shenandoah Valley Simmentals assumes no responsibility, legal or otherwise, for personal injury or loss while attending the sale, or for damages, illnesses, accidents or theft. All cattle are at the purchaser's risk as soon as sold. Assistance will be given in loading and shipping of cattle, but no risk is assumed by anyone associated with the sale.

ACCOMMODATIONS

Quality Inn Shenandoah Valley 540	0-740-3141
162 W Old Cross Rd, New Market, VA 22844	
Holiday Inn Express Woodstock 540	0-459-5000
1130 Motel Dr, Woodstock, VA 22664	
Courtyard by Mariott 540	0-432-3031
1890 Evelyn Byrd Ave, Harrisonburg, VA 22801	

REGISTRATION AND UPDATED EPDS

All cattle will be registered with the American Simmental Association. Please note EPDs may change from the time the sale book is printed until the registration papers are transferred. EPDs printed in the catalog were pulled from IGS on April 9, 2024. Shenandoah Valley Simmentals will transfer cattle to the buyer at the seller's expense after full payment is received. Buyers must provide the sale clerk with complete information for transferring registration certificates.

HERD HEALTH

All females will sell with proper health certificates for immediate interstate shipment. The bred females have been pregnancy examined and are confirmed safe, unless otherwise posted or announced. For cattle leaving Virginia, a Certificate of Veterinary Inspection will be available for immediate shipment. Cattle that require additional tests will be conducted within one week of the sale at the buyer's expense. Each animal will be at the purchaser's risk immediately following the auction.

LIVE BROADCAST

BULL GUARANTEE

All bulls have passed a complete breeding soundness examination performed by a veterinarian. All bulls are guaranteed for breeding soundness and injury for the first breeding season, defined as 90 days from the first turnout, barring abuse, neglect and poor management practices. If a replacement bull is needed, one of equal value will be provided. If a replacement bull is not available, a sale credit will be provided to use at the next SVS sale minus the documented salvage value of the previous purchase.

SEMEN INTEREST

Shenandoah Valley Simmentals will be selling full possession and 70% semen interest of all bulls and retaining 30% semen interest. The buyer has full control, full possession, 100% of the salvage value and 70% semen interest. Any bulls that Shenandoah Valley Simmentals wishes to collect for in-herd use semen will be done at the buyer's convenience and Shenandoah Valley Simmental's expense. This will affect very few bulls.

CE 11.3 | BW 2.8 | WW 80.7 | YW 113.3 | API 127.5 | TI 76.9 SVS GOOD TIMES HAT7 is a big, long, power cow who is deep, plus, she is long necked and has huge feet. Her dam, SVS FORGET-ME-NOT ATN7 sure stamped her mark on this female. Note the very similar type of SVS AGAINST THE WIND KAT7 long yearling bull, her maternal sib, who is also being offered. This SVS REVEILLE BU09 daughter, out of the SVS SNICKERDOODLE US09, SVS SANDY S019 and COTT KELBY 019K donor cow families, is unique. Use this high growth, powerful female to produce calves with style, length and growth. Females like her are hard to find!

SVS INDIA GUP7 is a big, stout, long-sided, powerful female with a touch of frame. Her maternal granddam, SVS PANSY PLF7, and maternal great granddam, SVS BLACK RUBY LB7B, are tremendous donors in our program. She goes back to one of Jeff Fitzsimmons' favorite bulls, DS Black Zinger. These older genetics still perform well for us today. She sells with a solid black heifer calf sired by our awesome new herdsire that Jeremie Ruble selected for us out of the High Ridge Dispersal, RVR WAYLON 287H. RVR WAYLON 287H is a former high seller from the River Creek program in Kansas, and is one of Bruce Cuddy's all-time favorite herd sires of any breed. This pair is a great two for one female package!

SVS FREEDOM FOR ALL GUM1 is the only mature bull being offered. He's thick, stout and is homozygous black. His progeny are moderate, arrive with ease and grow like weeds. His sire, CCR COWBOY CUT 5048Z, is still in demand but because of the rarity of his semen, direct progeny are few and far between. SVS FREEDOM FOR ALL GUM1's dam is a BLACK IRISH KANSAS x SVS WHAT A DOLL MB10. This is as good as it gets. You won't find many mature bulls running the country as royally bred.

SVS MUDSLINGER KAM1 is a big, stout, powerful, deep-bodied, big-footed 2-yr. old bull. Much like our mature bull, he traces back to both the CCR COWBOY CUT 5048Z bull and the SVS WHAT A DOLL MB10 cow. This time he has two additional big-time cows in his pedigree, TJ MS 38W and SVS RUBY RED. He's Homozygous Black and Homozygous Polled and should add length and a touch of frame, and his daughters should be super females. What more can you ask for?

A supplement sheet will be available sale day to include updated calving information, genetic coat color and horn/poll test results, and for bulls actual weights, scrotal circumferences, hip heights and yearling weights.

30 30 35 SVS RANGE ROCKET KDZU is a Homozygous Black son of the proven growth and power bull, TJ HEISMAN 388F. This cow family, SCC LETS TANGO 124J, has produced many outstanding progeny that never disappoint. Yes, he has scurs, but he is a moderate meat wagon who is deep-sided and nice-fronted. He is tailor-made for use on Angus-based cows. He will add look, he will add power, and he will add pounds!

 SVS AGAINST THE WIND KAT7 is freak-fronted, long-necked, big-footed, super soft pasterned, and really flexible on the go. He will make some fancy calves red or black. He is Homozygous Polled. His maternal sib, SVS GOOD TIMES HAT7, is also being offered. This SVS FORGET-ME-NOT ATN7 cow family produces uniquely beautiful phenotypes, whether males or females. These are the right kind!

SVS BIG TIME KGS2 is a stout, sound, deep, super soft-sided, loose-made son of SVS TIMBERLINE FB09. He traces to SVS SANDY S019, COTT KELBY 019K and SVS RED SUNSET. With balanced EPDs and these powerful donors in his lineage, this Heterozygous Black, Homozygous Polled bull should sire the right kind.

SVS POSITIVE IMPACT KGYL is deep, stout, sound and super quiet. He's built for the real cowboys and cowgirls. This bull is a honker with a residual rasp from a respiratory infection as a calf, but in no way does it affect his performance. With HOOKS SHEAR FORCE 38K, SVS ROSEBUD RL7B and SVS BLACK RUBY LB7B in his pedigree, this balanced EPD bull should sire daughters that make awesome cows!

SVS HEAVY METAL KHEH has some curl to his hair but he is deep, solidly constructed and big-footed. His daughters should be great considering he has HOOKS SHEAR FORCE 38K, SVS BLACK RUBY LB7B, WS All-Around Z35, CCR COWBOY CUT 5048Z and SVS VIRGINIA BELLE ASHA up close in his pedigree. He is Homozygous Black and Homozygous Polled and is a bull I'd planned on using myself. Super opportunity here!

I live about 30 minutes from Lisa and Shenandoah Valley Simmentals. I take the opportunity three to four times a year to walk through the cattle and see what's evolving in Lisa's breeding program. Over the years I have purchased many females and bulls. The bulls have been for myself as well as producers I purchased for in the Midwest. The females have been super productive. The heifers out of these cows are eye-appealing keepers that carry the productivity of their mothers. The cattle are calm, easy to work with and productive.

> - Bob Threewitts, Twin Oaks Farm Keezletown, VA

YEARLING BULLS

15 35 SVS ACE IN THE HOLE LY09 is a solid black heifer bull with high calving ease and -2 birth weight EPD. He only had a 65 lb. adjusted birth weight. He is long, sound, and smooth. He is a sleep all night heifer bull and a true female maker, with powerful donors SVS SANDY S019 and COTT KELBY 019K in his pedigree. Without a doubt, he should sire the keepin' kind.

NITEDIDED

AO

SVS OUTRIDER LEBJ is a stout, deep, boxy-made bull with a blaze face, white feet and belly with some extra chrome. He's perfect to use on solid colored Angus-base cows to add some pizzazz that everyone loves. Combining the exceptional female producer, SVS KEEP DREAMIN' RNB1 with genetics of the SCC LETS TANGO 124J cow family. SVS PATRIOT CXT7 and SVS HUMDINGER TR21 produced another winner. His dam, SVS RISE ABOVE EBZJ is also being offered. Great females make great bulls!

45

SVS BURNIN' DAYLIGHT LFB3 is a star-headed, big, stout, deep, thick, bull who is rugged-made. He'll add power, growth and stayability, plus he has CCR COWBOY CUT 5048Z and SVS BLACK SNAP-CRACKLE-POP genetics on the dam's side. His dam, SVS COWBOY LACE FBN3, is also being offered. He's a no nonsense bull who's ready to get the job done. No burnin' daylight here!

SVS PACKIN' IRON LCSA is a solid black, high growth, high maternal, high stay and high docility son of SVS BUSTIN' LOOSE EYR7 from the SVS ROSEBUD RLB7 and SVS BLACK RUBY LB7B cow family. He combines WS ALL-AROUND Z35 with SVS BLACK VANESSA on the bottom side. These days, packin' iron might be a good idea!

SVS CYCLONE LZO9 is a son of the outstanding SVS EVERCLEAR FAR2 and a grandson of WS ALL-AROUND Z35. He is backed by donor cow families of SVS SANDY SO19 and COTT KELBY 019K on the bottom side. This solid black bull, with balanced EPDs, should add growth and rock-solid genetics to any set of calves. These cow family genetics have worked for us for many years, so they should work for you.

 SVS HUCKLEBERRY LAOA is a SVS BUSTIN' LOOSE EYR7 son out of our tremendous SVS RIGHT AS RAIN ASOA donor. WITH MR NLC UPGRADE U8676, SVS SANDY S019 and COTT KELBY 019K in the pedigree, he should sire the right kind in high demand today. He's a spread bull with pedigrees that should perform in fescue and mountain country. Don't miss this opportunity to add these top end genetics to your herd.

QUICK REFERENCE TO ASA EPDS AND \$ INDEXES

16.5

11.4

31.4

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15-pounds more weaning weight than B. If calving ease were the trait, A would be expected to sire 15-percent more unassisted births in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www. simmental.org. Listed below are the units ASA EPDs are expressed in:

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.) Back Fat (BF): Inches of backfat.

Bitte Mainte (DM): Deve de effecte

Birth Weight (BW): Pounds of birth weight.

Calving Ease (CE): Percent of unassisted births when used on heifers. Carcass Weight (CW): Pounds of carcass weight.

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.

Milk (MLK): Pounds of weaning weight due to milk.

Marbling (MRB): Marbling score.

Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth.

Ribeye Area (REA): Square inches of ribeye.

Warner-Bratzler Shear Force (WBSF): Pounds of force required to shear a steak.

Stayability (STAY): Percent of daughters remaining in the cowherd at 6 years of age.

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. (See below for more details.)

Weaning Weight (WW): Pounds of weaning weight. Yearling Weight (YW): Pounds of yearling weight. Yield Grade (YG): Yield grade score.

\$ Indexes: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through wellconceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

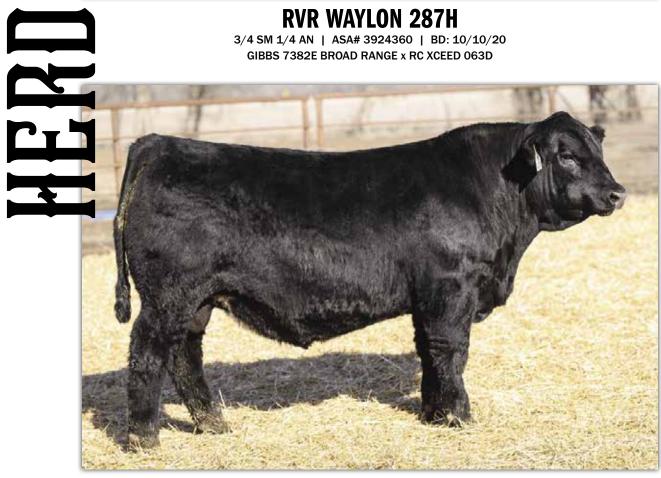

Terminal Index (TI): Evaluates sire for use on mature Angus cows with all offspring put on feed and sold

grade and yield.

Using API and TI: First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit simmental.org.
